Further, with the rise in number of organized retail sector worldwide there is a need to maintain shelf-life of various products and protect them from contamination will drive the liquid pouch packaging market in the forecasted time frame.

 Table of Contents

Liquid pouch packaging is available in different forms which includes stand-up, bag-in box, films, spout, vacuum, retort, center sealed and side gusted pouch. Stand-up pouches are the most popular in the liquid pouch packaging market owing to their market friendly features including, hang-hole features, tear notches and attractive billboards for graphics and labels.

Traditional technology can fill and seal only pre-made pouches. Contrary to this, present technology developed by Germany, produces liquid pouch packages directly from a film role, then fill and seals the pouch at the same time. New technology helps in filling of liquid pouch packages at a temperature as high as 95°C and at a rate of 500 pouches per minute. There are different types of liquid pouch packaging available in the market including, aseptic, blow modeling and form fill seal liquid packaging technology.
